

### R E M A R K S

Reexamination of this application and reconsideration of the rejection of the claims thereof are respectfully requested under the provisions of Rule 111 for the reasons set forth below.

Claims 54 and 57-59 stand rejected under 35 USC 112, second paragraph, because there is insufficient structure within the claims to support the functional recitation of cylinder rotation.

This rejection is believed to have been overcome by the amendment to claim 54 in reciting "means". Claims 57-59 have been cancelled.

Claims 56-58 stand rejected under 35 USC 102(b) on U.S. Patent No. 2,918,045 to Brown.

This rejection has become moot in view of the cancellation of claims 56-58.

Claims 40-47 and 59-53 stand rejected under 35 USC 103(a) on U.S. Patent No. 2,918,045 to Brown in view of U.S. Patent No. 4,341,826 to Prewo et al.

This rejection has become moot in view of the cancellation of claims 40-47 and 49-53.

Claim 59 stands rejected under 35 USC 103(a) on U.S. Patent No. 2,918,045 to Brown.

This rejection has become moot in view of the cancellation of claim 59.

Claim 48 stands objected to as being dependent upon a rejected base claim but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 48 has been cancelled and resubmitted as claim 60 dependent on allowed claim 55.

Claim 54 has been indicated as containing allowable subject matter and allowable if correctly amended.

Claim 54 is believed to have been correctly amended.

Claim 55 is indicated as allowed.

Applicant submits additional claims patterned after the allowable claims for consideration.

In view of the foregoing, early and favorable consideration is respectfully requested.

Respectfully submitted,
